

Eco-friendly wet-kit bags

The printed premium wet kit bags from KLS contain a chemical pro-degradant concentrate made and developed by EPI which accelerates their safe decomposition in landfill.

Bag texture and strength is unaffected so our bags can be used again and again around the home or business. They are also 100% recyclable so worn-out bags can be disposed of in any carrier bag recycle bin.

- 100% Recyclable
- Safely degrades in landfill
- EPI additive has no adverse effect on print quality
- Long shelf life
- Can be re-used multiple times in the home or business.
